Education

Ph.D. course in Mathematics, Seoul National University

March. 2023 - , Advisor: Seonhee Lim

B.S. in Physics, Hanyang University

Mar. 2016 - Mar. 2023 (Mandatory military service, Jul. 2019 - Jan. 2021)

Research Interests

Homogeneous Dynamics, Hyperbolic Geometry, and Ergodic Theory, Diophantine Approximation

Homogeneous dynamics studies dynamical systems on homogeneous spaces such as tori and hyperbolic spaces. Various key examples of homogeneous spaces are negatively curved as subjects of hyperbolic geometry. Ergodic theory is an important analytic tool for studying homogeneous dynamics. Diophantine approximation is a closely related to the homogenous dynamics and currently I'm working on this topic in the non-commutative algebras.

Conference Attended

2025 Algebra camp	Feb. 9 - 13, 2025
Yangpyeong, Korea	
Workshop on Homogeneous and Complex Dynamics	Mar. 26 - 28, 2025
Seoul national university, Korea	
2025 KMS Annual Meeting	Apr 24 - 26, 2025
Kaist, Korea	
Beyond uniform hyperbolicity I	Jun 2 - 6, 2025
ICTP, Italy	
Beyond uniform hyperbolicity II	Jun 9 - 13, 2025
ICTP, Italy	
2025 KMS Annual Metting	Oct 22 - 24, 2025
Science and Technology Convention Center, Korea	
Dynamical Group Theory VII	Nov 26 - 28, 2025
Seoul national university, Korea	
2026 Algebra camp	Jan 25 - 29
Elysian Gangchon, Korea	
Dynamical Group Theory V	Nov. 19 - 22, 2024
Gimhae, Korea	
2024 KMS Annual Meeting	Oct. 24 - 26, 2024
Seongkyunkwan university, Korea	
Dynamical Group Theory IV	Sep. 24 - 27, 2024
Kias, Korea	
Dynamical Group Theory III	Aug. 13 - 16, 2024
Kias, Korea	
Number Theory Intensive Lecture Series	June. 10 - 13, 2024
Postech, Pohang	
Dynamical Group Theory	Feb. 29, 2024
Kias, Korea	
2024 Algebraic Camp	Feb. 3-7, 2024
Yangpyeong, Korea	
2023 KMS Special Conference with 2022 Fields Medalists	Oct. 26-28, 2023
Seoul national university, Korea	

Awards

Award for Excellence in Teaching

Feb. 2024

Preprints

Khintchine's Theorem for Symmetric Matrices via Flows on the Space of Symplectic Lattices

arXiv preprint Jun. 3, 2026

TA Experiences

Differential and Integral Calculus Practice 2 (teaching)

Fall 2025

Honor Calculus Practice 1 (teaching)

Spring 2025

Engineering Mathematics 2, Advanced Calculus Practice 2

Fall 2024

Engineering Mathematics 1, Mathematics for Biology

Spring 2024

Calculus Practice 2 (teaching)

Fall 2023

Linear Algebra

Spring 2023
